

World Climate

Key Facts

1. I can name the six main biomes (aquatic, desert, forest, grassland, rainforest and tundra).
2. I can name all six climate zones: Polar, Temperate, Arid, tropical, Mediterranean and Mountains.
3. A biome is a specific geographic area notable for the species living there. A biome can be made up of many ecosystems.
4. A vegetation belt is plant life as a whole within a certain geographical area.
5. A micro climate is the climate of a very small or restricted area, especially when this differs from the climate of the surrounding area.

Assessment

I can identify different biomes on a world map.

I can describe and understand key aspects of vegetation belts.

I can identify different climate zones on a world map.

I can describe the different climate zones.

I can collect data about local micro-climates.

I can present and analyse data collected.

Key Vocabulary

biome
climate
micro-climate
vegetation belt
aquatic
temperate
tropical
Mediterranean
mountains
tundra
polar
arid
